Graduation Project Registration Form

Project #	
Project Title	Nakhlawi
Proposed by (name and email)	Zainab Hassan Al-Badi - 2220002372
Department / Program	Computer Information System
Supervisor (name and email)	Albandary Mohammad Alamer
Associate supervisor (name and email)	-
Expected Outcomes	• **AI Image Recognition:** Capture a photo of the palm/tree/fruit to detect diseases, pests, or nutrient issues. • **Instant Recommendations:** Receive suggested solutions and care instructions directly in the app. • **Expert Consultations**: Book online or physical sessions with experienced farmers and specialists. • **Service Booking:** Schedule services like fertilization, pruning or treatment. • **Palm Care Records:** Track history of treatments and monitor tree health. • **Reminders & Notifications:** Get alerts for fertilization, watering or pruning schedules.
Brief Description	Nekhlawi is a smart mobile application that empowers palm owners to care for their trees while preserving the expertise of traditional farmers. The solution combines AI image recognition with an expert consultation platform to: • Diagnose palm tree diseases or issues instantly by simply taking a photo. • Provide recommended treatments and guidance. • Connect palm owners with agricultural experts for online or on-siteconsultations. This approach ensures palm health and sustainability while giving experts a modern platform to share their knowledge.
Skills Required	• Mobile Application Development • Artificial Intelligence and Machine Learning • Computer Vision and Image Processing • Database Design and Data Management • System Analysis and Software Engineering (UML, SRS) • UI/UX Design • Cybersecurity and Data Protection • Teamwork, Project Management, and Technical Documentation
Specialized Tutoring	• Technical guidance in **Artificial Intelligence and Deep Learning** for model development and optimization.
